
WHOLE HOUSE FILTRATION KIT

10BWHT-KIT

Twin 10" Jumbo Kit for Tank or Mains

APPLICATION

Designed for whole house application either via Tank supply or Town mains supply, the jumbo KDF-GAC filter is a two media cartridge consisting of KDF media (high purity copper-zinc alloy) and GAC (granulated activated carbon) Through the electrolytic and oxidation reactions of the KDF and the adsorption and entrapment capabilities of the GAC, the KDF-GAC filter can remove or greatly reduce a wide range of contaminants.

FEATURES

- Removes up to 98% of chlorine and dangerous by-products
- Reduces heavy metals like lead, arsenic and mercury
- Helps control Scale
- KDF controls the build-up of bacteria, algae and fungi in the filter.
- Better tasting water and no bad odour,
- Less wear on towels, bedding napkins and other items that are laundered frequently on site
- Removes pesticides and other chemicals
- No chemical additives in the water
- Removes particles, sediment and rust down to 1 micron

KIT COMPONENTS

1. Jumbo 10" Filter Housing x 2
2. Filter 10BDGA – Variable Density Cartridge
3. Filter 10BKDF-GAC – Dual Media cartridge Consisting of KDF and GAC
4. Stainless Steel Bracket
5. Stainless Steel Screws
6. Spanner
7. Pre-Plumbed with 20 – 25mm (tank supply or town supply) Connection and Ball Valve
